LICO
SWISS QUALITY FLOORS

SWISS MADE

Size: 7.5 x 200 x 1235mm
Packing: 15.95 sq.ft / 6pc / box

MICODUR
STRUCTURE

- **100% Waterproof**
- **Free PVC**
- **High Definition Printing**
- **Extra Thickness 7.5mm**

Waterproof

① KORUS protection
② Lightfast digital print
③ Mineral board
④ GREEN Sound – Sound impact

ADVANTAGES

NATURAL PRODUCT
Micodur – mainly consisting of a cement fibre board – is the successful alternative to synthetic, ceramic or wood-based flooring – and all this in perfect harmony with nature. In addition, Micodur can be easily dismantled and can be 100% recycled with the Second Life process.

DIMENSIONALLY STABLE, WATER AND FIREPROOF
The special characteristic of Micodur is the completely mineral base board, which provides the best properties such as fire resistance (A2fl-s1) and 100% water resistance. Furthermore, thanks to its high dimensional stability, up to 1000m² (10 750 ft²) can be laid without expansion or separation joints.

UNLIMITED DESIGN VARIETY
Micodur scores not only in technical matters, but also in terms of aesthetics: Using digital printing, it is possible to print on Micodur with any desired design. A value of 7/8 (on a scale of 1-8) is achieved for light fastness.

DURABLE
Micodur also convinces with its high durability, which is achieved with the KORUS surface technology. As a result, Micodur is ideal for the highly strained object area (fulfils class 33), as well as for domestic use (class 23).
